DETAILED ACTION

This action is in response to applicant's response filed on 01/09/2008. Claims 114 are now pending in the present application.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hyakutake (US 4,933,767).

Regarding claim 1, 12 and 13, Hyakutake discloses a demodulator (figure 6), an apparatus comprising the demodulator and a method arranged to demodulate a first signal with the aid of a second signal, the demodulator comprising: a first bandpass filter (53) arranged to recover the first signal from a received signal; and a second bandpass filter (51) arranged to recover the second signal from a received signal; in which the passband of the second bandpass filter is substantially narrower than the passband of the first bandpass filter (figures 6, 7, 9, and 10; column 4, lines 28-46).

Regarding claim 2, Hyakutake discloses wherein the demodulator comprises compensation means (69) for compensating phase error between the recovered first and second signals (column 6, lines 7-26).

Regarding claim 3, Hyakutake discloses wherein the compensation means comprises a delay element that is arranged to delay the recovered first signal (column 6, lines 7-26).

Regarding claim 4, Hyakutake discloses wherein the compensation means comprises a phase shifter (69) that is arranged to shift a phase of the recovered first signal, the phase shift being dependent upon the phase difference between the recovered second signal and a reference signal (column 6, lines 7-26).

Regarding claim 10, Hyakutake discloses wherein the demodulator further comprises a phase locked loop (see figures 6 and 9) for stabilizing the recovered second signal (column 4, lines 28-46).

Regarding claim 11, Hyakutake discloses wherein the recovered second signal is used for frequency down converting at least a third signal (figures 6 and 9; column 4, lines 28-46).

Regarding claim 14, Hyakutake discloses a mixer connected to the first and second bandpass filters to mix the first signal and the second signal (figures 6 and 9; column 4, lines 28-46).

Allowable Subject Matter

3. Claims 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 1-4 and 10-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quochien B. Vuong whose telephone number is (571) 272-7902. The examiner can normally be reached on M-F 9:30-18:00.
